

Tutorial for google earth engine account creation

1. Go to <https://code.earthengine.google.com/>

Create or link your current email account to a new account of google earth engine. It is possible to require a gmail/google account.

Fill all data that asks you in the forms.

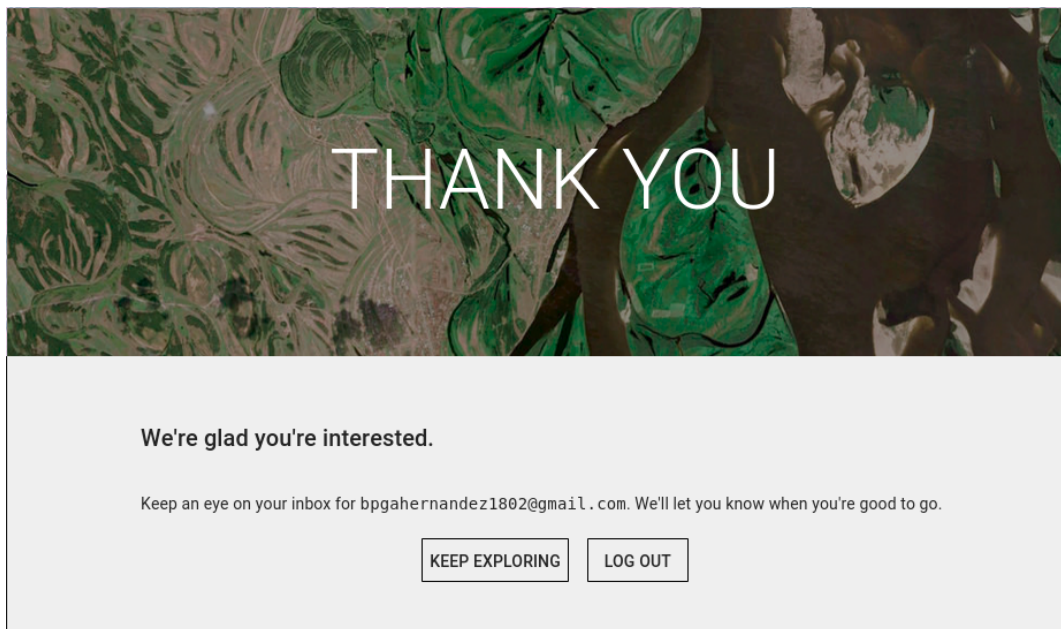

The screenshot shows a web browser window with the URL <https://signup.earthengine.google.com/#/>. The form contains the following fields:

- Email:** bpgahernandez1802@gmail.com
- Full name *:** A text input field with the placeholder "Please tell us your first and last name."
- Affiliation/Institution *:** A text input field with the placeholder "Which organization are you a part of? Give a homepage URL if possible."
- Institution type *:** A dropdown menu with the placeholder "Select the best description for your institution, or choose Other and clarify."
- Country/Region *:** A dropdown menu with "United States" selected and the placeholder "Please tell us where you live."
- What would you like to accomplish with Earth Engine? *:** A text input field with the placeholder "Please describe in a few sentences how you intend to use Earth Engine."

The last field should contain a full sentence.

Once you successfully complete the form, you will have the following screen.

2. Go to the following url: <https://code.earthengine.google.com/>

Then you will be ready to try the google earth engine code sandbox.
